## Allen Introduces the New MP (Mechanical Pro) Series Riders

The new Allen MP series which includes MP215, MP235 and MP315 appears as a totally redesigned version of the MP205, MP215 and MP305 Mechanical Drive Riding Trowels. The new machines are an entry level riding trowel with the features found in our larger riders. The higher horsepower gasoline engine and heavy-duty drive train is packed in an easy-to-service frame. The Standard-Duty Gearboxes and four-bladed rotors are proven performers in the field. The MP series is now equipped with a Torque Converter Clutch which gives the operator full variable speed control of the rotors. The updated MP series is one of the latest additions to Allen's Riders family which is launched for 2011.

The new MP series standard features include:

- ▶ Manual steering and blade pitch controls
- ▶ A GX690 (688cc) Air Cooled Honda gasoline engine
- ▶ Torque converter clutch system
- ▶ Two 46" diameter (MP315) and 36" (MP215 and MP235), 4-blade non-overlapping rotors
- ▶ Variable rotor speeds up to 145 RPM
- ▶ Four lights and 12 volt charger
- ▶ Electric powered spray system for application of retardant
- ▶ Flip-up seat and a removable screen for superior accessibility to engine, clutch and drive-line.
