

## What is new on the MP series (Mechanical Pro) riders from Allen 2011

**Allen MP315**

**Allen MP235**

**Allen MP215**

The new MP standard features include the following:

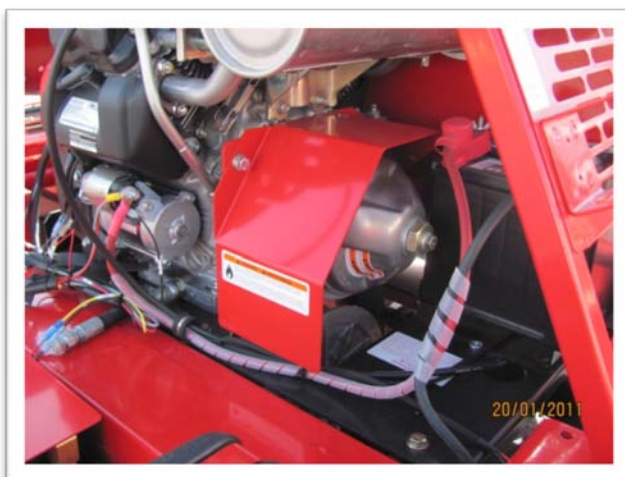

- ▶ Unified design of the machines in the series, including chassis, engine, torque converter clutch , etc.
- ▶ Stronger gasoline engine Honda GX690 (688 cc) air-cooled, approximately 26 hp
- ▶ Torque converter clutch which allows to obtain higher torque on rotors at start moment and higher RPMs while troweling (up to 145 rpm) as well as smooth RPM control
- ▶ Updated gear-box suspension
- ▶ Adjusting control levelers which allows operator to set-up a right steering sensitivity
- ▶ 4 lights, 2 in front and 2 behind
- ▶ Output power 12 Volts
- ▶ Electric powered spray system
- ▶ Folding seat and removable panels for easy access to engine and transmission
- ▶ 4 lifting holes on the frame
- ▶ Bracket on the frame for a hand trowel
- ▶ Improved design of the document compartment, as well as fuel and water tanks
